EDUCATION

University of California, Irvine, The Paul Merage School of Business, Irvine, CA **06/2026**
Master of Science in Business Analytics

- Technical Skills: Python, SQL, Power BI, Alteryx, ArcGIS, Regression Analysis, Machine Learning, Forecasting, Predictive Analytics

University of Houston, C.T. Bauer College of Business, Houston, TX **12/2023**
Bachelor of Business Administration

- Concentration: Marketing | Dean's List | Magna Cum Laude

PROFESSIONAL EXPERIENCE

Kaiser Permanente **Pasadena, CA**
Data Analyst **01/2026 – 06/2026**

- Collaborated on a student-led consulting team partnering with Kaiser Permanente to analyze CRM and operational workforce data, evaluating productivity, efficiency, workload distribution, and organizational capacity
- Developed Python-based workforce planning and capacity models to identify staffing gaps, resource allocation opportunities, and operational bottlenecks throughout the organization
- Applied forecasting techniques to project future workload demand and assess staffing requirements under proposed organizational restructuring and operating model scenarios
- Delivered executive-facing Power BI dashboards and data-driven recommendations to leadership stakeholders, supporting workforce planning, organizational restructuring, and future-state model design

Amazon **San Diego, CA**
Area Manager (Operations Analyst) **04/2024 – 05/2025**

- Received a full-time offer following a successful Operations Analyst Internship, leading workforce planning, resource allocation, and process improvement projects across high-volume supply chain operations
- Analyzed root causes and labor trends using Amazon dashboards and Excel (VLOOKUP, pivot tables, KPI calculations) to track daily operational performance and identify inefficiencies, leading a data-driven initiative that reduced First Pass Yield defects by 27.5%
- Led process improvement projects using quantitative analysis and Excel-based performance modeling, exceeding FPY benchmarks by 137% and generating \$1,000+ in monthly savings
- Designed and executed a Same Day Shipping improvement initiative using real-time data tracking that reduced priority package misses to below 14% benchmark and delivered \$4,000+ in weekly savings
- Contributed to driving warehouse to #1 in San Diego Region, #3 in Sub Super Region, and #7 in North America West Region in Cost, Safety, and Customer Experience Metrics

ANALYTICS PROJECTS

Waymo Safety Impact Analysis | Python, Econometrics, Difference-in-Differences

- Applied Difference-in-Differences econometric modeling to evaluate the relationship between autonomous vehicle expansion and traffic safety outcomes using California crash data

Credit Card Approval Prediction Model | Python, Machine Learning

- Developed machine learning classification models to predict credit card approval outcomes and identify key drivers influencing lending decisions

Trade Area & Customer Segmentation Analysis | Alteryx, ArcGIS, Data Analytics

- Leveraged Alteryx and ArcGIS to analyze customer demographics and geographic market data, identifying high-potential trade areas and customer segments to support location strategy decisions

Airbnb Booking Analysis & Logistic Regression Model | Python, Statistical Modeling

- Built logistic regression models to evaluate factors influencing Airbnb booking likelihood and provide data-driven recommendations for listing optimization
