Business Skills: Dashboard Development, CRM Management, Workforce & Capacity Planning, Process Improvement, Root Cause Analysis, Stakeholder Reporting

EDUCATION

University of California, Irvine, The Paul Merage School of Business <i>Master of Science in Business Analytics GPA 3.6</i>	06/2026 Irvine, CA
University of Houston, C.T. Bauer College of Business <i>Bachelor of Science in Marketing Dean's List Magna Cum Laude</i>	12/2023 Houston, TX

PROFESSIONAL EXPERIENCE

Lemo Wellness <i>Growth Analyst</i>	Irvine, CA 06/2026 – Present
- Architect and maintain a CRM platform end-to-end, establishing SOPs for customer management, lead tracking, and sales operations to standardize a scaling sales process. - Build executive dashboards in Tableau and Excel to monitor growth metrics, sales performance, and key business KPIs, delivering actionable insights that guide strategic decision-making. - Use SQL to extract, clean, validate, and manage CRM data, ensuring data integrity across reporting, customer insights, and business analytics.	
Kaiser Permanente <i>Business Analyst Consultant</i>	Pasadena, CA 01/2026 – 06/2026
- Partnered with Kaiser Permanente as part of a student-led consulting team to analyze CRM and operational workforce data, evaluating productivity, efficiency, workload distribution, and organizational capacity. - Built Python-based workforce planning and capacity models to identify staffing gaps, resource allocation opportunities, and operational bottlenecks across the organization. - Applied forecasting techniques to project workload demand and staffing requirements under proposed organizational restructuring and operating model scenarios. - Delivered executive-facing Power BI dashboards and data-driven recommendations to leadership stakeholders, supporting workforce planning and future-state model design.	
Amazon <i>Operations Analyst</i>	San Diego, CA 04/2024 – 05/2025
- Converted to full-time Operations Analyst after a successful internship, leading workforce planning, resource allocation, and process improvement across high-volume supply chain operations. - Analyzed root causes and labor trends using Amazon dashboards and Excel (VLOOKUP, pivot tables, KPI calculations), driving a data-driven initiative that reduced First Pass Yield defects by 27.5%. - Led process improvement projects using quantitative analysis and Excel-based performance modeling, exceeding FPY benchmarks by 137% and generating \$1,000+ in monthly savings. - Designed and executed a Same Day Shipping improvement initiative using real-time data tracking, reducing priority package misses below the 14% benchmark and delivering \$4,000+ in weekly savings. - Helped drive the warehouse to #1 in the San Diego Region, #3 in the Sub Super Region, and #7 in the North America West Region across Cost, Safety, and Customer Experience metrics.
